	TASK
l	To continue updating WOAH standards in the WOAH Terrestrial and Aquatic Codes relevant to AMR and needed capacities of Member Countries and to complete standards in the WOAH Terrestrial and Aquatic Manuals
1.2	Update of other chapters related to AMR/AMU
1.2.2	WG to review TORs for Chapter ad hoc group for 6.8
1.2.4 1.3	Be updated on AAC feedback Manual of Discreption and Vessines for Torrestrial Animals
1.3.2	Manual of Diagnostic and Vaccines for Terrestrial Animals Update/provide feedback on Chapter 2.1.1
	To provide WOAH Members, through activities undertaken under the PVS Pathway, with tools and capacity-
2	building activities, with a greater focus on AMR including update of policy and legislation
2.1	Oversight of CBD activities around AMR (i.e., e-modules, PVS IS tool and AMR CC9)
3	To continue to develop the WOAH List of Antimicrobial Agents of Veterinary Importance, considering a) the inclusion of antimicrobials only used in companion animals, b) the sub-division of the List in the different animal species, and c) the expansion of the List, to include over time antiparasitic agents of veterinary importance such as anthelmintics, insecticides and acaricides
3.1	WOAH List of Antimicrobial Agents of Veterinary Importance, subdivision by species
3.2.3	Feedback on WOAH List survey to Members on categorisation criteria
3.2.4	Approve purpose section and diagram for the WOAH List
4	To further develop the WOAH data collection on Antimicrobial Agents Intended for Use in Animals, converting the current spreadsheet format to a database system, able to accommodate data submissions by animal species, and its connection to the World Animal Health Information System (WAHIS) and also allowing additional data from field studies
4.1	WOAH Global AMU Database (ANIMUSE)
4.1.2	Advise on the refinement of the numerator, denominator (biomass) and reporting
4.1.3	Advise on having a quantitative reporting option on species level
4.2	Field level data
5	To work with Animal Food Production sectors and institutions such as the World Veterinary Association and related professional bodies for supporting the development of species-specific treatment guidelines to be used at sub-regional and national level and the establishment of a global repository of existing clinical treatment guidelines and tools
5.1	Essential Medicines Lists for livestock species (Brooke-WVA)
5.1.1	Assessment of Brooke and WVA EML lists for bovine, small ruminants, swine and equine
6	To explore the possibility of building an information system of falsified or substandard drugs in the animal sectors illegally circulating within and between countries and building on the experience of the monitoring systems set up by WHO for drugs designated for human use taking a "One Health" approach
6.1	Substandard and falsified products
5.1.1	Guide WOAH's work on substandard and falsified veterinary products project
7	To encourage research based on robust methodologies, aiming at comparison of results, that focuses on a better understanding of the dynamics and epidemiology of AMR, from an integrated "One Health" perspective, on the development of priority vaccines and other alternatives to antimicrobials, of proven safety, efficacy and quality and on rapid diagnostic and sensitivity tests specific for veterinary medicine, building on public-private partnerships
8	To explore the opportunity to develop standards or guidelines related to autogenous vaccines and other alternatives to antimicrobials, including guidance for quality, safety and efficacy, as tools to reduce the need to use antimicrobials
3.1	Autogenous vaccines
	Be informed on progress from CC on reflection paper, and advise on next steps to follow
3.1.3	Alternatives to antimicrobials (ATA)
3.1.3 3.2	, ,
3.1.3 3.2 3.2.2	Be informed on progress from internal WOAH publication (i.e., Bulletin or other) and advise on next steps
