

Deduction tree on compiling supportive information on the maintenance of official CSF-free status

Question	Deduction tree				
2. Does the Veterinary Authority continue to have current knowledge of, and authority over, all domestic and captive wild pig herds in the country?	Yes	Indicate if there are no changes from what had been reported in your country's annual reconfirmation of the previous year. OR If there are any changes with regard to demographic data on domestic and captive wild pig herds, animal identification and registration system or structure/organisation of the Veterinary Authority during the past 12 months, please provide a brief description of those changes.			
	No	Please describe why and provide corrective measures and timeline for the implementation.			
3. Is surveillance conducted in accordance with the relevant provisions of Article 1.4.6. or Articles 15.2.28. to 15.2.33.?	Yes	Is there CSF-specific surveillance in place?	Yes	If clinical surveillance is in place, provide detailed information on the target animal population and clinical inspections conducted for CSF (e.g. number of farms inspected, number of animals examined, frequency of inspections, results). If serological surveillance in place, provide detailed information on the target pig population and the actual animals tested for CSFV indicating the testing method(s) and the final result. Serological survey design could be provided (but not mandatory). Describe the follow-up actions of any positive reactors on serological tests to determine if they are indicative of infection or not. The follow-up actions should include at least clinical inspection of the original holding, supplementary testing of the animals that tested positive, in-contact animals, and animals with epidemiological links.	
			No	Have any CSF suspect cases been reported for the past 12 months?	Yes
	No		No		If no CSF suspect cases are reported, please provide a list of awareness campaigns/ trainings/ meetings/ simulation exercises conducted for the past 12 months. OR

						If no awareness campaigns/training/meetings/ simulation exercises conducted for the past 12 months, please describe any other activities conducted to maintain the sensitivity of the early warning system.
	No	Please describe why and provide corrective measures and timeline for the implementation.				
4. If pig commodities have been imported in the past 12 months, were they imported in accordance with requirements at least as strict as those in Chapter 15.2.?	Yes	Indicate if there are no changes from what had been reported in your country's annual reconfirmation of the previous year.	Yes (pig commodities were imported from countries/zones not having a CSF-free status officially recognised by WOAH)	Provide a list of countries/zones from which pig commodities were imported and describe the requirements that accompanied such imports (or provide a copy of the veterinary certificate that clearly states the sanitary requirements) and how those requirements comply with Chapter 15.2. OR In case alternative measures to the ones stipulated in Chapter 15.2. for imports from infected countries are applied to imports from such countries, provide documented evidence that Chapter 5.3. has been followed to determine that the alternative measures applied to such imports achieve an equivalent level of risk mitigation as the provisions of aforementioned Chapter.		
		In particular specify: have any pig commodities been imported from countries/zones not having a CSF-free status officially recognised by WOAH (please refer to Classical swine fever - WOAH - World Organisation for Animal Health)?		No further information is required.		
	No	Please describe why and provide corrective measures and timeline for the implementation.
